# VMSCOPE
Beyond the scope of microscopy

# Digital Microscope
VM Slide Explorer 4.0

Fully integrated
into Pathology Information Systems and LIMS

- Integration into your LIMS system: Nexus/PATHOLOGIE, PCS/Athena, …
- Digital slides to a case open automatically, without any click
- Imaging results are transferred to the system automatically

Automatic Quantification
of immune stained slides

- Automatic quantification of Ki67, ER PR, CD3, CD15 and more
- Evaluation is performed simultaneously in the background while you work
- Results as image, Excel table or export into your LIMS system
